Campbellford Memorial Hospital Updating Screening Requirements

June 29, 2022 – With the COVID-19 situation remaining stable across the Province, effective June 30th, 2022, visitors and patients to Campbellford Memorial Hospital (CMH) will no longer need to actively screen in upon entry. Visitors and patients, excluding those seeking care in the Emergency Department, will still need to self-screen prior to entering the hospital and are asked not to attend if they are feeling unwell or experiencing any COVID-19 like symptoms.

Universal masking will still be required in all areas of the hospital, and surgical grade masks will be available upon entry. Cloth masks are not sufficient. While proof of COVID-19 vaccination will no longer be required for visitors, it is still strongly encouraged.

Patients and visitors can enter the hospital through the accessible entrance beside the emergency department, or through the main entrance, which has been closed to the public throughout the pandemic, between 8AM and 8PM Monday to Friday. Access to the hospital outside of these hours, including on weekends and holidays, must be made through the Emergency Department.

CMH would like to thank the community for its patience and cooperation during the COVID-19 pandemic and would like to remind the community that both the cafeteria and gift shop are also again open to the public for the use of patients and visitors.

Current infection prevention and control measures and visitor information is always available on the hospital website at www.cmh.ca/COVID-19
